

STATE OF HAWAII — DEPARTMENT OF TAXATION
Instructions For Form N-168
Income Averaging for Farmers and Fishermen

GENERAL INSTRUCTIONS

Use Form N-168 to elect to figure your 2011 tax by averaging, over the previous 3 years (base years), all or part of your 2011 taxable income from your trade or business of farming or fishing. This election may give you a lower tax if your 2011 income from farming or fishing is high and your taxable income for one or more of the 3 prior years was low.

In order to qualify for this election, you are not required to have been in the business of farming or fishing during any of the base years.

You may elect to average farming or fishing income even if your filing status was not the same in the election year and the base years.

You do not have to recompute, because of this election, the tax liability of any minor child who was required to use your tax rates in the prior years.

You may need copies of your original or amended Forms N-11 or N-15 that you filed for 2008, 2009, and 2010 to figure your tax on Form N-168. If you do not have copies of those returns, you can get them by filing Form L-72, Request for Copies of Hawaii Tax Return. Form L-72 may be obtained from any district tax office, by mail, or via the Internet at:

A fishing business does not include any scientific research activity which is conducted by a scientific research vessel.

nection with the Exxon Valdez civil action described above. Qualified settlement income includes all such awards, whether received before or after the judgment and whether related to a settlement or a judgment.

SPECIFIC INSTRUCTIONS

Line 2 — To figure your **elected farm income**, first figure your taxable income from farming or fishing. This includes all income, gains, losses, and deductions attributable to your farming or fishing business. If you conduct both farming and fishing businesses, you must figure your elected farm income by combining income, gains, losses, and deductions attributable to your farming and fishing businesses.

Elected farm income also includes any gain or loss from the sale or other disposition of property regularly used in your farming or fishing business for a substantial period of time. However, if such gain or loss is realized after cessation of the farming or fishing business, the gain or loss is treated as attributable to a farming or fishing business only if the property is sold within a reasonable time after cessation of the farming or fishing business. A sale or other disposition within one year of the cessation is considered to be within a reasonable time.

Elected farm income does not include income, gain, or loss from the sale or other disposition of land or from the sale of development rights, grazing rights, and other similar rights.

Generally, income, gains, losses, and deductions from farming or fishing are reported on:

- Form N-11 or N-15, income from wages and other compensation you received (a) as a shareholder in an S corporation engaged in a farming or fishing business or (b) as a crew member on a vessel engaged in a fishing business (but see Fishing business on this page);
- Form N-11 or N-15, income from Exxon Valdez litigation;
- Form N-11 or N-15, deduction for one-half of self-employment tax, but only to the extent that deduction is attributable to your farming or fishing business;
- Form N-11 or N-15, CCF reduction, except to the extent that any earnings (without regard to the carryback of any net operating or net capital loss) from the operation of agreement vessels in the fisheries of the United States or in the foreign or domestic commerce of the United States are not attributable to your fishing business;
- Federal Schedule C or C-EZ;
- Capital Gain/Loss Worksheet in the Form N-15 instruction booklet;
- Federal Schedule E, Part II;
- Federal Schedule F;
- Schedule D-1; and
- Federal Form 4835.

Your **elected farm income** is the amount of your taxable income from farming or fishing that you elect to include on line 2. You do not have to include all of your taxable income from farming or fishing on line 2. It may be to your advantage to include less than the full amount, depending on how the amount you include on line 2 affects your tax bracket for the current and prior 3 tax years.

If you received certain subsidies in 2011, your elected farm income cannot include excess farm losses. See the instructions for federal Schedule F (Form 1040).

Your elected farm income cannot exceed your taxable income. Also, the portion of your elected farm income treated as a net capital gain cannot exceed the **smaller** of your total net capital gain or your net capital gain attributable to your farming or fishing business. If your elected farm income includes net capital gain, you must allocate an equal portion of the net capital gain to each of the base years. If, for any base year, you had a capital loss that resulted in a capital loss carryover to the next tax year, **do not** reduce the elected farm income allocated to that base year by any part of the carryover.
